

METALDEX™ ULTRACLEAN

METALDEX™ ULTRACLEAN is engineered to deliver more effective cleaning and accurate sizing while increasing available open area.

Features:

- Easy pin-style fastening
- Available in 3/16" ; 1/4" ; 3/8" ; 5/16" ; 1/2" ; 3/32" ; 1/8" ; 9/16" ; 5/8" aperture sizes
- 30mm panel thickness
- 1x2 modular screen media

Applications:

- Dry, fine-sizing applications for product cleaning or dedusting, eliminating blinding or plugging, and increasing throughput
- Discharge ends of decks that are overloaded or not effectively cleaning the product to gain additional throughput

Benefits:

- The "zigzag" wire design is oriented across the flow of the screen to enable smaller apertures while providing secondary movement that prevents entrapment of material to eliminate blinding and plugging
- The small gauge wire offers more efficient throughput
- The modularity of the panel allows it to be used with our PIPETOP™ media system for competitive open area and easier, lower cost repair and replacements
- Has 6.3 in² more available screening surface per panel than similar modular wire products, which equates to 3.5 ft² of additional screening area on an 8' x 20' screen deck.
